

Summer School on Lévy Processes 22.07.-24.07.2010, TU Braunschweig, GERMANY

The Summer School offers four lecture series, each of about 5x45 minutes, covering topics such as an introduction to Lévy processes, applications to risk theory, stochastic partial differential equations driven by Lévy noise, or path properties of Lévy processes.

The speakers are:

David Applebaum (Sheffield)
Claudia Klüppelberg (Munich)
Szymon Peszat (Warsaw)
Yimin Xiao (Michigan)

All participants will have the possibility to present a poster or talk, but the total number of participants is limited.

The Summer School is part of the
**6th International Conference on
Lévy Processes: Theory and Applications**
26.07. - 30.07.2010, TU Dresden, GERMANY
